SUMMARY

Motivated Computer Science student with comprehensive knowledge in Java, Python, HTML, CSS, and JavaScript. I bring strong problem-solving abilities, excellent communication skills, and a collaborative teamwork approach. My passion lies in development and crafting modern, user-centric application designs that deliver exceptional experiences.

EXPERIENCE

Leader Experience

DEC - 2025

Team Lead - Diptiva Mobile Application

- Team Lead for 7-member team
- Developed Diptiva, a role-based academic mobile application
- Led system architecture, backend authorization, real time communication, AI-assisted learning features, and push notification workflows
- Focused on Production-grade quality, secure role enforcement, and scalable design

Projects

MENS WEAR E-Commerce Website

Mar - 2025

- A fully responsive e-commerce frontend featuring product listings, dynamic categories, and advanced search functionality. Built with clean, semantic HTML, modern CSS, and vanilla JavaScript.

ELITE FEET

Mar - 2025

- Modern men's footwear e-commerce platform with stunning UI design. Features smooth animations, intuitive navigation, and flawless cross-browser optimization for the best shopping experience.
